PROFILE

Full-stack web developer specializing in building end-to-end web applications — from pixel-perfect frontends to robust backends. Experienced in e-commerce platforms, admin dashboards, and interactive UIs. Passionate about clean code, great UX, and modern tech stacks.

PROJECTS

Attaret Al-Yarmouk — E-Commerce Platform Live

2024 · Real commercial project

Full-featured online store for herbs, spices, and natural oils. Includes product catalog with search and filters, shopping cart, WhatsApp checkout integration, real-time order notifications, customer order tracking, and a complete admin dashboard with discount management.

HTML5 Tailwind CSS JavaScript Supabase
PostgreSQL Realtime Netlify

Admin Dashboard — Store Management System

2024

Advanced admin panel for e-commerce management with sales analytics, full product CRUD, order management with status updates, real-time notifications without page refresh, and advanced search and filter capabilities.
